

Nova Tetrahydrofural Alcohol

Cas Number:97-99-4

Typical Properties

Molecular Weight:	102.13
Boiling Point:	178°C
Flash Point:	183°F
Vapor Pressure:	0.2mm @ 20°C
Refractive Index:	1.452
Odor:	Mild

Specifications

Specification	Value	Method
Tetrahydrofurfuryl Alcohol, Assay wt. %	98.0, min	
Furfuryl Alcohol, wt. %	0.1, max	
1,2-pentanediol, wt. %	1.6, max	
Moisture, wt. %	0.3, max	
Color, APHA	50, max	
Appearance	Water white to very pale yellow liquid	

Packaging and Shipping

Available in bulk or FCL and LTL drum quantities, FOB, Houston, Texas, USA.

Notes: Tetrahydrofurfuryl Alcohol, CAS# 97-99-4, is listed on the U. S. TSCA Inventory and the EINECS List for sale in the European Economic Community (EC# 202-625-6).

*Nova Tetrahydrofural Alcohol is sold without expressed or implied warranty.
